SKILLS SUMMARY

- **Languages:** Python, JavaScript, Java, HTML, CSS
- **Frameworks & Libraries:** Flask, SQLAlchemy, LangChain, Bootstrap, Chart.js
- **Databases:** PostgreSQL, SQLite
- **Tools & Platforms:** Git, GitHub, Postman, FAISS (vector store)
- **Concepts:** REST APIs, RAG (Retrieval-Augmented Generation), CRUD operations, User Authentication, DOM Manipulation
- **Soft Skills:** Problem Solving, Communication, Team Collaboration

EXPERIENCE

Infosys | AI Intern Jan 2025 – Feb 2025

- Engineered AI prompts for NLP model optimization, improving model response accuracy and performance.
- Implemented Azure AI services for vision, speech, language processing, and intelligent search applications.
- Developed real-time translation features using Azure AI Translator.

IBM | Cybersecurity & Ethical Hacking Intern Feb 2025 – Mar 2025

- Conducted penetration testing and vulnerability assessments using Kali Linux.
- Performed network security analysis using tools such as Nmap, Wireshark, and Metasploit.
- Assisted in identifying security threats and implementing mitigation strategies.
- Contributed to the development of **THEncrypterX**, a secure file encryption system using AES-256, XChaCha20, and Serpent encryption algorithms.
- Implemented secure key management and metadata protection mechanisms using Argon2 and HKDF-SHA3.
- Performed security and performance testing for secure large-file encryption handling.

PROJECTS

Library Management System | Python · Flask · PostgreSQL · SQLAlchemy [Github Link](#)

- Built a full-stack Library Management System with complete CRUD operations for books and members, including book issue/return transaction workflows.
- Integrated the Frappe Books API to auto-import book records, significantly reducing manual data entry effort.
- Implemented an analytics dashboard using Chart.js displaying top 10 most borrowed books and highest-revenue customer reports.

Expense Tracker with Dashboard | Python · Flask · PostgreSQL · Flask-Login · Chart.js · Bootstrap [Github Link](#)

- Developed a personal finance web application with full user registration and login (Flask-Login), enabling secure multi-user expense tracking.
- Built an interactive dashboard using Chart.js showing daily, weekly, and monthly spending breakdowns by category.
- Designed a responsive UI compatible across devices, with category-wise expense classification and data persistence via PostgreSQL.

AskPDF – AI-Powered PDF Q&A | Python · Flask · LangChain · Google Gemini API · FAISS

- Built an AI-powered PDF Q&A application using Flask, LangChain, and Google Gemini, enabling users to upload any PDF and ask natural language questions.
- Implemented Retrieval-Augmented Generation (RAG): chunked PDF content, generated FAISS vector embeddings, and performed semantic search to retrieve contextually accurate answers.
- Designed a conversational chat interface that displays source page references alongside AI-generated responses, improving answer traceability.

EDUCATION

The Assam Kaziranga University Jorhat, India
Bachelor of Technology - Computer Science and Engineering (GPA: 6.72/10) 2021 - 2025

Gateway Academy Junior College
Class XII Percentage(AHSEC): 74.6% 2018-2020

Foundation English School
Class X Percentage(SEBA): 61.5% 2018
